

Indoor Air Quality

PRODUCT INFORMATION

Aprilaire®
Fresh Ideas for Indoor Air®

Aprilaire Whole-Home Air Systems

To protect the health and comfort of your family, the only truly effective solution is a whole-house solution. That's the philosophy behind Aprilaire. Consider one or more of these products for healthier, fresher and cleaner indoor air every day of every year:

HOME AIR PURIFIERS

Aprilaire's Whole-Home Air Cleaners make your air as clean as possible by removing particulates from the air — important to those with allergies and asthma and for those who want clean air for themselves and their family. An Aprilaire Air Cleaner installed by CPS can help rid your home of dust, dust mites, pet dander, mold spores, pollen, bacteria and viruses, smoke and more.

FURNACE HUMIDIFIERS

A Whole-Home Humidifier delivers the perfect amount of moisture to the air — making you feel more comfortable at lower thermostat settings. In fact, the EPA estimates you can save up to 4% on your heating bill for every degree you lower your thermostat. Increase your family's level of comfort—and protect your valuable furnishings—by adding just the right amount of moisture.

HOME VENTILATION SYSTEMS

Not providing enough outside air into your home can aggravate and increase indoor pollutant levels. Ventilating a home by opening doors and windows may not always be possible due to outdoor noise levels, rain, snow or weather conditions. An Aprilaire Ventilation System allows you to ventilate your whole-home's stale, polluted indoor air with fresh air way 365 days a year.

Guardian Air Oxidation Systems

Destroy pollutants at the source, in the air and on surfaces, before they can reach your family.

The Guardian Air™ system sends advanced oxidants throughout the room to kill microbials at the source. It's one of the most effective ways to reduce contaminants in your living space. Studies have shown up to 99% removal of micro-organisms.

Over a million of these units are in use throughout the world—mostly in hospitals, hotels, schools and public and commercial buildings. Now the technology is affordable for many families who are concerned about the air they breathe inside their homes.

BENEFITS:

- 99% reduction in surface bacteria/virus
- Over 80% VOC reduction
- 78% of microbes in human sneeze killed at 3 feet
- 97% airborne bacterial reduction
- 99% reductions of Ecoli, Listeria, Strep and Bird Flu
- 85% odor reduction
- 99% reduction of Staph (MRSA)
- 99% food surface microbial reduction
- Guardian Air's technology has been featured on Fox News, ABC, CBS and Popular Science Magazine

CPS Heating & Cooling has the experience and training to install and service a Guardian Air system in your home's HVAC system. Ask us today for details on this amazing home purification product.

CENTRAL DEHUMIDIFIERS

Air conditioning alone can't satisfy your home's humidity requirements. Your air conditioning system is designed to control temperature, not humidity, and only removes some humidity as a byproduct of cooling. An Aprilaire Whole-Home Dehumidifier is the complete solution for your home's excess indoor humidity problems.

ZONE CONTROL SYSTEMS

One room too hot while another is too cold? Not with Zoned Comfort Control. The

Aprilaire Comfort Control is a system of more than one thermostat—electrically connected to a control panel—which operates the dampers in your forced air heating/cooling system. Conditioned air is distributed to various parts of your home as needed. The system can be

installed in new or existing homes—helping you achieve total indoor comfort.

Your Indoor Air Quality Consultant

Contact CPS today to learn more about how the pollutants in and around our homes affect our indoor air quality, as well as what you can do to improve your home's health.
